

15-400 Milestone 5
Max Slater
<https://thenumbat.github.io/15400-s21/>

Changes

No changes this time.

Accomplished

1. Implemented final type of bounding volume.
2. Started implementing GPU version.

Milestone

Progress has been slow over the past 2 weeks, since I've had a lot of work for other classes. I am ramping up the GPU work now though, since I am now free to work on final projects. Originally I wanted to be done with the GPU work by now, so I'm still about a milestone behind.

Surprises

Nope, not much has changed since last milestone.

Looking Ahead

By the next milestone, I plan to have the GPU implementation complete, so basically just a lot of programming to do.

Revisions

Still same as last milestone: aiming to hit the 100% goals, but I won't have time for 125%.

Resources

Currently using RTX 3090 machine.
